wide & 84" tall.**

**48 For Doors Up To 48"
wide & 96" tall.**

Benefits of Multi-Point Locking

The typical break-in occurs when a burglar tries to kick in or pry the door from the frame at the lock area. Multi-point locking defeats this method by protecting the door like a bank vault. Bolting the door to the frame in 4 independent locations. The 4840 can be used on your existing door or new construction as a solution on stock rooms, computer rooms, safe rooms, utility closets, firearm storage rooms, remote buildings and other non-emergency doors.
