

TORNADO AND FORCED ENTRY RESISTANT Multi-Point Locking

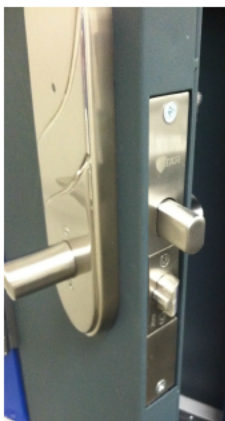

**Integrated Deadbolt System Has Passed
Tornado-Resistance Testing Conducted by
Nationally Recognized Independent Laboratories
for compliance with latest editions of FEMA
361 /320 and ICC-500 Standards**

MODEL 102

**Top Bolt Engages into the Head to
provide load distribution under
pressure and missile impact**

**Primary
Mechanism
includes Fire
Rated latch and
1" throw
deadbolt**

**Three 1" Throw Stainless
Deadbolts Working
Simultaneously**

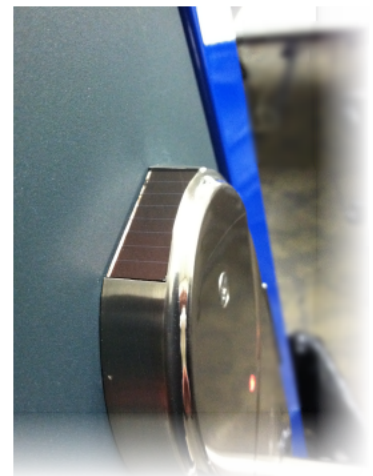

**Bottom Bolt projected horizontally
into strike jamb allowing to avoid
floor preparations**

**LED Indicator integrated into interior trim signals when
bolts are not projected and door is not armed**

**Interior Trim provides one-
motion operation retracting
ALL bolts and the latch
simultaneously by turning
inside lever**

**Solar Element recharges
lithium battery by ambient
room light**
